

Bone morphogenetic protein 7 in dormancy and metastasis of prostate cancer stem-like cells in bone

Aya Kobayashi, Hiroshi Okuda, Fei Xing, Puspa R. Pandey, Misako Watabe, Shigeru Hirota, Sudha K. Pai, Wen Liu, Koji Fukuda, Christopher Chambers, Andrew Wilber, and Kounosuke Watabe

Vol. 208, No. 13, December 19, 2011. Pages 2641–2655.

The authors noted that a reference regarding the suppressive effect of BMP7 on EMT and bone metastasis in prostate cancer was inadvertently omitted. The authors have added the following publication to the references:

Buijs, J.T., C.A. Rentsch, G. van der Horst, P.G. van Overveld, A. Wetterwald, R. Schwaninger, N.V. Henriquez, P. Ten Dijke, F. Borovecki, R. Markwalder, et al. 2007a. BMP7, a putative regulator of epithelial homeostasis in the human prostate, is a potent inhibitor of prostate cancer bone metastasis in vivo. *Am. J. Pathol.* 171:1047–1057.

The html and pdf versions of this article have been updated to reflect this change.
